Version 9.1.277 (30 November 2026)

Data Warehouse

Created new datasource cpEmailStatistics (#157439)

Problem

- New datasource EmailStatistics needs to be added

Solution

- Created new datasource EmailStatistics

Added latest Create pdmContractPeriods to the DWH (#143175)

New Functionality

- Added latest Create pdmContractPeriods to the DWH

Identity and Authorisation

Remove webauthn verification requirement when registering credential (#156258)

Problem

- Currently we require the android app's webauthn assertion to be validated and verify on the app before it gets registered, but V9 should do it.

Solution

- Remove the requirement.

People Management

Queue V8 appointment deletion in the background (#157057)

Problem

- Deleting an appointment can leave the screen waiting after the deletion has already been saved.

Solution

- Show deletion progress and refresh the appointment history as soon as the save finishes. - Process the V8 deletion in the background with automatic retries.

Performance Management

Include Payroll Id on User Details Reponse Objects (#157682)

Problem

- Request to additionally provide the Payroll Id for a user through the PM Multiple User Contracts endpoint

Solution

- Included Payroll Id on User Details object.

Implemented new change to allow to set first item max as score 0 (#159079)

Problem

- The first score range could not be set to 0–0, preventing a separate label for a score of zero.

Solution

- The first range now supports 0–0, and zero scores display the assigned label. The following range continues to update automatically.

Added access bypass to preview template (#159101)

Problem

- Both Review setup template grpc call is being called fro preview and edit, which throws an no access permission denied

Solution

- Added a bypass logic rule on the preview to still allow to preview as the access policy is in place for edit

---
