Version 9.1.244 (6 July 2026)

Communication Portal

Resolved translation for no files path (#152035)

Problem

- Incorrect path for no files

Solution

- Corrected path

Report Builder

Fixed export button not working (#151660)

Problem

- The Export to Excel button on the report raw-data popup was visible, but clicking it did not reliably download a usable Excel file

Solution

- Fixed the raw-data export flow by rebuilding the popup’s report table correctly, wiring the export button to the DataTables Excel export action, returning export data in the format expected by the current DataTables library, and cleaning the exported column headers

---

Performance Management

Increase size on Create Agreement Modals (#152167)

Problem

- When hovering/selecting the Copy From Template option, the text wraps and pushes the rest of the content outside of the container
- The same issue happens if the text length is increased

Solution

- Increased the overall modal size and the option sizes, and centered/aligned the content to allow for more space for text to wrap

Rework bulk actions move people select query to increase performance (#152202)

Problem

- On Bulk Actions contract move, for large people groups, the people select times out

Solution

- Reworked query into temp tables to improve performance
