

User Perspective

The user perspective is similar to the editor perspective. When opening a catalogue, the user will also be required to complete a guided tour.

The primary difference between the user perspective and the editor perspective is that the user does not have the “Add new page” or the “Edit” buttons. The user will only be presented with a Navigation Button. This button will allow the user to navigate, without providing them with the ability to edit a catalogue.

Revision #2
