Toolbox: Types of Pathway Steps

To assist the pathway administrator in guiding the learner/employee through content several types of pathway steps are available. Each step will be discussed in an individual article. This article provides a list of all the available Pathway Steps.

Pathway Step	Examples
Acceptance	The learner/employee accepts the terms and conditions for a specific course.
Adobe Connect - Live Sessions	The learner/employee views an Adobe LIVE session as part of their course.
Adobe Connect - Recorded Sessions	The learner/employee views an Adobe Connect session as part of their course.
Assessment (Online)	The learner/employee completes an online assessment on theory material which forms part of the course.
Assessment (Practical)	The learner/employee is evaluated practically and the result is uploaded as a learner record.
Assignment (Upload Document)	The learner/employee uploads assignments or POE documents as part of their course.
Catalogue	The learner/employee views a product catalogue.
Certification Point	The learner/employee completes prerequisite pathway steps and receives a certification point. The learner/employee can download a certificate for the course they completed. This is usually the last step in a pathway.
Comment	The learner receives an outline of instructions or outcomes for the course. This is usually the first step in a pathway.
Document (Download)	The learner downloads a document, such as theoretical material or a module outline document.
Invoice	The learner completes information required to receive an invoice for the course they are completing.
Learning Guide	The learner/employee downloads a learning guide document saved in the Signify Learning Guides module.
Movie	The learner/employee watches a movie.
Pathway Connector	The learner/employee can access a refresher course or a course which proceeds the course they just completed.

Pathway Step	Examples
Question Mark Assessment	The learner/employee completes an assessment created in Question Mark through the course on Signify.
SCORM / xAPI	The learner/employee completes an interactive learning package. For examples of SCORM packages make sure to view some of the content developed by Signify: https://www.signify.co.za/elearning.html
Sharepoint Document	The learner/employee downloads a document saved to SharePoint.
User Message	The learner/employee can provide feedback on their experience of the course.
Workshop (Event)	The learner/employee can book themselves on a classroom event.
Zip Folder	The learner can download several documents or images in a zipped package.
