

Version 9.1.114 (9 September 2024)

People Management

Various fixes (#119885)

- Hide the username from the Summary on the card view
 - The person and Line Manager

The screenshot shows a grid of employee cards. A modal window is open for Derek Kotze, displaying his profile picture and a detailed summary of his information. The modal window has a close button (X) in the top right corner.

Derek Kotze

Organisational Unit Local	Position Title Sales Clerk
Appointment Date 01/01/2020 (4 Years; 8 Months)	Line Manager Lee-Ann Janse van Rensburg
Work Anniversary 01/01/2025 (5th)	Last Login Date

Other visible employee cards include:

- Nick Harris, Sales Manager
- Kenneth Lomax, Database Admin
- Anton Naidoo, Accounts Clerk
- Jane Sigfield, System Administrator

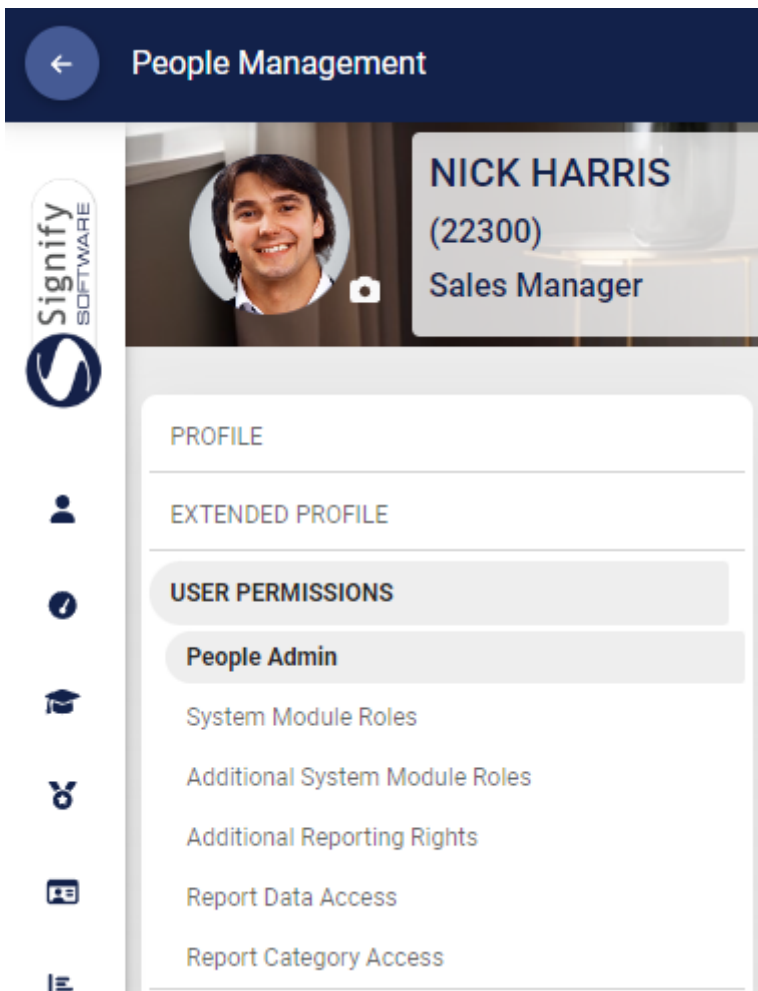

- The Grid View is ONLY available on the Manage People section

Manage People

PERSON	POSITION	LOCATION IN ORGANISATION	CAN LOG IN	POSITION ACTIVE	APPOINTMENT START DATE
Andre Potgieter (22552)	Financial Director	Lee-Ann R2 Signify Software South Africa Finance	✓	✓	18/01/2024 0 Years; 7 Months
Gary Davidson (22933)	Accounts Clerk	Lee-Ann R2 Signify Software South Africa Finance Accounts	✓	✓	01/01/2020 4 Years; 8 Months

My Team, My Department and My Company

- Change the wording under the User Permissions
 - Change “System Modules Admin” to “System Module Roles”
 - Change “Additional Roles” to “Additional System Module Roles”

System errors (#120034)

- A change has been made to how the Ruleset ID is handled when a user's session expires.
- Suppose the user becomes unauthenticated at any point due to session expiry.
- In that case, an unauthorised error will occur but when the Ruleset ID is not found then the standard Ruleset ID is null error will occur.
- In this process, authorisation was also added to the People Group services, which caused the error to be unhandled.

Correct appointment creation when adding a new user on the front end (#118751)

Problem

- When appointing a user with RabbitMQ slightly lagging the appointment creation collides with the user materialisation trying to create an existing user.
- When creating a new tenant with a code that belongs to a deleted tenant the page breaks

Solution

- Only materialise a user when it does not exist and do not throw the exception
 - Change the existence check and unique constraint on code to only check for tenants that have not been deleted.
-

Performance Management

Incorrect display in the header of contract (#119961)

Problem

- The slash ('/') in the Review Setup name and the display of that translation being HTML-safe encoded resulted in the text to not displaying correctly

Solution

- Ensure that the slash ('/') is displayed without strange characters

Search doesn't work on the "Move agreements screen" (#119960)

Problem

- The global search's default functionality was triggering a form submission and reloading the bulk actions page which resets all the filters and defaults to the logs page.

Solution

- Detach and override the global search submit button on Bulk Actions. This allows the standard data table functionality to work and filter.

Evaluations - Headings should not be caps (#119892)

Change the first rating item's heading to:

- WHAT IS YOUR OVERALL EXPERIENCE OF THIS PERSON? (OPTIONAL)
 - Caps
 - Bold

The rest of the items in grey should NOT be bold - keep sentence case as is

Evaluations - The icon does not indicate whether an evaluation has been added (#119871)

- Added icon to indicate the number of evaluations

When evaluations are not enabled, the summary button should not be visible on the Rate modal (#120072)

- Hide the summary button on the rate model when the settings for evaluations are not enabled

Evaluation Summary - Evaluation Comment should have a max display (#119945)

- Added the standard rules for text-areas
 - Text-area display max: 200 characters
 - On hover: 350 characters

Revision #1
