Version 9.1.143 (3 February 2025)

Import

Employee Data Import error (#126586)

Problem

- The pre-import does not validate duplicates correctly when the strings have different cases
- The staging translation does not display correctly

Solution

- Add case-insensitive checks in the pre-import validation for
  - Duplicate usernames
- Job with code ({item.JobCode}) has differing data: {jobProfilerValidation} for fields Job code, Occupational Categories, OFO code, job grade
- Position {item.PositionTitle}({item.PositionCode}) has different position titles for fields Position Code
- More than one active appointment for a position. on position code
- Corrected and added missing translations
