Version 9.1.151.1 (Support Release - 18 March 2025)

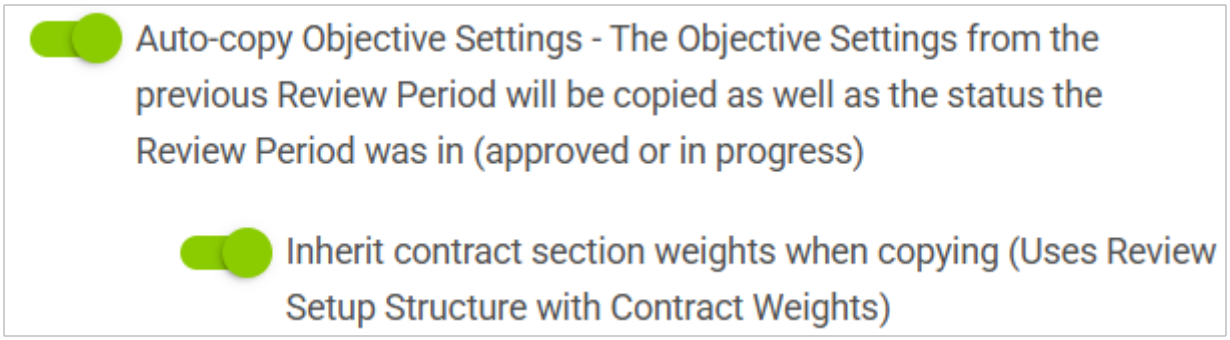

Performance Management

Copy the weights of the contracts instead of the Review Setup when using the Copy from Previous (#126081)

- When only the following setting is enabled:

- Then the section weights are copied from the review setup
- If both settings are enabled:

- Then the section weights are copied from the contract that you are copying from.

Agreement finalized with empty section when section weight change is not allowed (#129009)

Problem

- On the Review Setup, the Primary Goals Setup does not allow the section weight to be changed.

- After importing the following error was thrown, but the contract was created and finalized with the Primary goals section left blank.

Solution

- The Import will stop if an invalid agreement will be created

Able to import the same file on two different setups in the same year (#129006)

Problem

- The user could not import multiple periods at the same time, and the user could create a contract in more than one period item.

Solution

- Changed PM Import so you can import multiple periods at the same time, as well as excluding users from creating contracts in more than 1 item per review year

---

Audit

Investigate and implement solutions for better audit data retrieval (#119199)

Problem

- Get an error message when trying to get audit data for a specific table

Solution

- Corrected mapping of audit log lists to populate the front-end page

---
