Version 9.1.156 (7 April 2025)

Performance Management

Auto copy error (#129765)

Problem

- Auto copy auto approval fails when Action Plans are enabled.

Solution

- Exclude the AP section from the validation before the auto-approval happens

Indicate that all fields are mandatory (#129755)

Problem

- Required fields for moderation were not displayed making it unclear what is needed.
- When only ticking an item as moderated but then having other items which are correctly validated the react validation passes, and an incorrect error is displayed "failed to save"

Solution

- Add scss and class handling to indicate which fields are required.
- Fix validation not checking that All moderated items must pass.

Original score changes when you save the moderated score (#130375)

Problem

- The final rating displays the actual final rating value which gets overwritten when you moderate the item to the moderated value, then making it display the moderated rating as the final rating.

Solution

- Changed that the final rating column always displays the pre-moderated final rating

Moderated labels not shown when you impersonate (#130374)

Problem

- The employee dashboard is showing calibrated instead of moderated when contract moderations have been approved.

Solution

- Fix the employee dashboard to correctly display that contract has been moderated.

The moderator cannot unapprove the agreement after approving it (#130379)

Problem

- When QA is not required and the moderator approves the moderation the Change button is disabled, the moderator cannot then change or revert the moderation.

Solution

- Do not disable the Change button for moderation when QA is required and a QA score has not been provided.

Organisational Structure

The system is Duplicating Org Name (#129973)

Problem

- The Org name is displayed twice on the Org Builder Screen.

Solution

- Removed additional div that displays the org name

Notifications

Own SMTP sender details being used even though RS1 details are selected for sending emails (#129364)

Problem

- When turning off the "Use Own SMTP" setting and saving, then turning it back on, the system would reset the sender email to **master@signify.co.za** instead of keeping the previously used email.

Solution

- A new field was added to store the last sender email used, so when "Use Own SMTP" is re-enabled, it restores the correct email instead of resetting.

HR Processes

Inactive Workflows are Still Seen by the Bot (#130062)

Problem

- Cannot change active process code to inactive process code
- Can activate a process with the same code as an existing active process

Solution

- Correct update check
- Add validation when activating a process for a used active code
