

# Version 9.1.164 (2 June 2025)

## Learning Management

LMS Portal: Subject Setup: No Cycle 'Weight in Period' Validation (#132285)

### Problem

- When saving the weights of a cycle which exceeds 100, it is unclear where the issue is.

### Solution

- Add validation client-side to indicate the invalid weights in red

LMS Portal: Marksheet: Save does not work when entering and Removing Input in an Empty Row (#132306)

### Problem

- When adding and removing data on empty columns of a marksheet, it cannot be saved.

### Solution

- Check that the item for the cells has items; otherwise, skip it

---

## System Access

## Allow support user functionality not working (#132363)

### Problem

- Unable to log in with a support user when disclaimers are active on a ruleset

### Solution

- Change the authentication process during support to skip the disclaimer acceptance
- 

## Ruleset Management

### When on the Notification Tab, the Image Resources Tab disappears (#128559)

#### Problem

- The image resources tab disappeared when navigating to the notifications tab in ruleset setup.

#### Solution

- Added a missing navigation tab for image resources when navigating from the notifications tab.
- 

## Report Builder

### Information for the BOTS (#130430)

TBA

### Error when changing condition (#132342)

#### Problem

- An error occurred when trying to preview data when the 'list' operator was selected as a filter condition.

### **Solution**

- This was due to a syntax error in the query, which is now resolved.
- 

## **Performance Management**

### Add functionality to delete multiple templates at once (#120577)

#### **Problem**

- Can only remove one template at a time on the PM Review Setup Templates
- Modal is very small when a selection is required to select templates for bulk deletion
- Translation missing for en-GB
- When the modal is displayed to remove multiple templates, you can click on which then navigates you to the template

#### **Solution**

- Add a new option to remove multiple templates at once.
- Show a larger modal for Bulk delete templates
- Added Translation for en-GB
- Remove the check to be able to navigate to the template

### Manager Ratings not updated when Manager and Final Ratings can be completed simultaneously (#127230)

#### **Problem**

- With the setting to do both final rating and manager rating, the banner scores for Manager Rating is not being updated on the contract

#### **Solution**

- Add a new check to also update the Manager Rating along with the Final Rating when both are captured
- 

## Data Warehouse

I want to have the audit data in the DWH so that I can create a report for the recalculated scores (#130423)

### Problem

- The new recalculated score fields are not available within the Report Builder

### Solution

- Added the new recalculated score fields within the Report Builder (DWH)

## Adjustments for Term 2 - Phase 1 (#132175)

### Problem

- The Term 2 and Term 4 EXAM Marks need to be included within the subject list for reports

### Solution

- Added the Term 2 and Term 4 EXAM Marks within the subject list

## Tenant Usage stats (#131639)

### Problem

- The Tenant Usage Stats data needs to be available within the Data Warehouse

### Solution

- Added table TenantUsageStats with the required fields within the Data Warehouse
-

# Notifications

## Tooltip when hovering over item on Exports list incorrect (#122691)

### Problem

- The tooltip for the download icon in the Exports section incorrectly displays "Export" instead of "Download."

### Solution

- Updated tooltip text to "Download".
- 

# People Management

## [Appointment History] Reference Name and Surname fields are not marked as required (#131180)

### Problem

- When adding/editing an employment history record, the save fails if you do not provide the reference name and contract information. This is because it is required/expected on the backend but not on the Modal.

### Solution

- Make reference name and surname & reference contact required.

## Issues on People Management Module (#131783)

### Problem

- When a user searches on People Management, the search filter persists even when the user logs out and logs back in. This confuses sessions, as some results are not available.

### Solution

- When the user clicks logout, clear the filterCriteria if it exists from the local storage

---

## HR Processes

### Not All Jobs Positions are Available on the Workflow Reporting Lines (#132320)

#### Problem

- When a position has a termination date in the future it cannot be found when setting up an HR process

#### Solution

- Change the filter in the query to include position in the future and only include users

---

## Languages

### Add en-ZA as language and set as default (#132295)

- Add a new culture for en-ZA on V9.
  - Ensure that the necessary translation files are added.
  - Ensure that en-ZA can be selected by the user - if the language is published on the ruleset.
  - Ensure that translations and date formats still work when en-ZA is used as a language.
