

Version 9.1.164.1 (Support Release - 3 June 2025)

Performance Management

Path to link Signify to Power BI (#132335)

Problem

- An additional api required to export all user contract data for a review year and review setup

Solution

- Create a copy of rpc ListReviewYearSetupUserContracts (ListReviewYearSetupUserContractsRequest) returns (ListReviewYearSetupUserContractsResponse); and extend to include all users
- Include location in org
- Remove image path for performance

Imports

PaySpace Signify discrepancy script (#129254)

Problem

- When data is not staged in the user stagings for an import, then the exported Excel sheet is broken without data.
- Data fields are inconsistent in the export

Solution

- Add a check to export a default error
- Add a caste to shortdatestring for datetime and datetime? fields

PaySpace (#132260)

Problem

- When the Payspace client does not grant access to the OrganizationPositionDetail, then the following API call fails as forbidden
- string url =
`${connector.BaseUrl}/v1.1/{companyId}/OrganizationPositionDetail?$count=true";`

Solution

- Add try catches when pulling data for the OFO code to suppress and log the failure should it occur, and then continue with the import
-

Imports

Issue when importing data in another root than IN01 (#132815/132240)

Problem

- When providing other data in the import for org level 1 than the default IN01 data, the import fails with the error: The org node to link the user's position to could not be found."

Solution

- Add org level 1 as received data, and fall back to the default only when no data is provided
-
-
