

# Version 9.1.184 (22 September 2025)

## Ruleset Management

Admins don't have access to the required Integrations screens (#131940)

### Problem

- Some admins don't have the required permissions to the Setup and Configuration admin menu -> Integrations

### Solution

- Grant admins permissions
- 

## Notifications

Students are unable to determine which lesson they need to review based on the absentee notifications. (#136423)

### Problem

- The client utilised subgroups across multiple pathway classes, which resulted in the Pathway Group/Class being the same for various pathways. As a result, students were unable to determine which lesson they needed to review based on the absentee notifications.

### Solution

- Included the pathway name in the absentee notifications, so students can clearly see which lesson they need to complete
-

# Report Builder

Date picker format remains on English (SA) when changing to English (US) (#135930)

## Problem

- Date formats were not properly implemented on the report builder and jQuery date pickers.

## Solution

- Implement date formats in the report builder and apply them globally to jQuery date pickers. Also added global date format methods for WebMVC JavaScript
- 

# Tenant Management

Current Date format not as per language set in user's Preferred Language (#136191)

## Problem

- Incorrect date format is displayed (not according to user language preference) on the update expiry modal.

## Solution

- Ensure that the date is formatted according to the language preference of the user on the modal.
