

Version 9.1.202 (15 December 2025)

Performance Management

Add missing template migration file (#138767)

Problem

- Migration file not generated for template changes

Solution

- Add missing translation file
-

Ruleset Management

Resolve position of dropdown menu (#137794)

Problem

- Communication portal new menu is bit high in which the first item can not be seen

Solution

- Add a change to shift the menu a bit down in the case where it is rendered in the footer

Improve URL input sanitisation and validation (#124124)

Solution

- Replaced SingleOrDefault with FirstOrDefault in Ruleset.cs for registration field lookup.
- Removed [Url] attribute from RulesetSystemAccessViewModel properties.

- Updated _RulesetSystemAccess.cshtml to use for URL fields and adjusted min value for DaysActiveForRegisteredUsers.
 - Set default sanitizedValue to string.Empty in ValidationActionFilterAttribute.
 - Minor formatting fix in ValidationService.cs.
-

Data Warehouse

Added new Registration fields within jpJobProfiles, jpOrganisationalNodes and accRulesets (#138087)

Problem

- New Registration fields need to be added to the DWH

Solution

- Added new fields AvailableForRegistration, DisclaimerAcceptanceMessage, DisclaimerMessage, ShowNotificationAtLogin and ShowNotificationAtRegistration within jpJobProfiles
 - Added new fields AvailableForRegistration within jpOrganisationalNodes
 - Added new fields DaysActiveForRegisteredUsers and EnableRegistrationApproval within accRulesets
-
-
