Version 9.1.238 (15 June 2026)

People Management

Resolve bug where reporting lines are not updated from the profile Summary Section (#151683)

Problem

- Changing user reporting lines from the Summary Tab does not persist changes.

Solution

- Moved check that determines if reporting lines have changed to the row click handler for the reporting line selection to ensure the flag gets set correctly.

Remove leading and trailing whitespaces from username when creating or updating a user (#149383)

Problem

- Users can be created with usernames containing leading and trailing spaces (copy-paste issues), resulting in duplicate users, which can cause sync issues

Solution

- Ensure that when ensures are created or edited, trim the username to ensure no leading or trailing spaces

Resolve the issue where no managers displayed when adding a new person. Fix paging and add name, surname sorting to employee modal (#151299)

Problem

- Manage modal did not display managers from
- Add Person function
- Manager modal paging and sorting were not correct

Solution

- Display managers when adding a new person
- Fix sorting and paging

Imports

Auto-populate the Talent Manager with the Line manager's details (#151532)

Problem

- Request: Auto-populate the Talent Manager with the Line manager's details

Solution

- Ammend CustomUserImportSteps SP to auto-populate the Talent Manager with the Line manager's details

---

Report Builder

Add a check for existing report roles before adding or removing (#151294)

Problem

- After saving an initial report role list for a user, a subsequent update to the list throws an error.

Solution

- Add a check for existing report roles before adding or removing

---
