

Version 9.1.254.6 (Support Release - 23 September 2026)

HR Processes

Change from Enum Type to int value over query sending (#151556)

Problem

- The enum value type was sent over as a query param, and in some cases it threw a 501 within gRPC, meaning the value could not be mapped

Solution

- Added a change to send the int ID value and then map it back to the enum type
