Version 9.1.260 (28 September 2026)

Imports

Added Payroll connector and frequency name to master data (#155755)

Problem

- Oversight on CR for master data on multiple pay roll connectors, have to save a connector id with the master data item

Solution

- Add Payroll connector ID
- Add frequency and frequency name split

People Management

Increase width of user selection drop-down on user merge modal (#156045)

Problem

- The search field is small and cannot display long names and Users properly.

Solution

- Made the drop-down wider to accommodate longer names.

Ruleset Management

Add more bustable methods to the gRPC cache (#152420)

Solution

- Add more bustable methods to the gRPC methods

HR Processes

Change from Enum Type to int value over query sending (#151556)

Problem

- Enum value type was sent over as a query param, and in some cases it threw a 501 within gRPC, meaning the value could not be mapped

Solution

- Added a change to send the int ID value and then map it back to the enum type

Data Warehouse

Implemented fixes/improvements for StudentSubjects and TermResults calculations (#156192)

Problem

- Fixes and improvements need to be implemented for calculations with StudentSubjects and TermResults

Solution

- Implemented fixes/improvements for StudentSubjects and TermResults calculations

---

Performance Management

Copy Lock Access settings over for create from another (#156229)

Problem

- When copying a contract over from another person, access lock settings is not copied over

Solution

- Add lock settings to copy over
- Correct display order on the rating scales
