

Version 9.1.266 (20 October 2026)

Communication Portal

Resolved delete system alert (#156447)

Problem

- Delete system alert pulls the entire entity and relationships, which are thousands of recipients, causing a timeout

Solution

- Add a rule for cascade delete and pull the parent entity to delete
-

Data Warehouse

Updated step for jpHRProcesses to include fallback PeopleGroup (#157187)

Problem

- Currently, HRProcesses will not return any PeopleGroup details from Fallback
- The ordering of HRProcesses data sources needs to be updated - Field LatestEditedDate needs to be removed within jpAppointments

Solution

- Added a step to update the PeopleGroupName field with the fallback PeopleGroupName if available within HRProcesses

- Updated the Display Order fields for HRProcesses per Approval Levels - Update field LatestEditedDate to be archived for jpAppointments
-

HR Processes|V9-Ruleset Management

Fix default landbot icon showing briefly before showing custom landbot icon (#157339)

Problem

- When a custom icon is configured for landbot, the default icon briefly shows before the custom icon is displayed.

Solution

- Completely load the custom icon before displaying any icon.
-

People Management

Resolved cache bustable method defined for person updates (#157402)

Problem

- Missing bustable methods

Solution

- Added gRPC bustable methods 66 minutes ago
-

Performance Management

Prefix timeline ratings tooltip with review period name (#157358)

Problem

- Request from a client to have the ratings tooltip on the timeline display the period name + rating. Eg "Mid-Year Ratings"

Solution

- Prefix rating tooltip with review item name

Increase Performance Contract timeout to 30 minutes. (#157361)

Problem

- Request to increase the timeout on PM contract lock check from 20 minutes to 30 Minutes.
- Older V8 rulesets cannot work correctly due to CSP issues

Solution

- Increased performance contract timeout.
- This pull request updates the HTTP header middleware to support multiple Content Security Policy (CSP) versions based on a configurable ruleset, improving flexibility and security handling. The middleware now determines which CSP version to apply per request, adds a new implementation for the legacy CSP (V1), and refactors method names for clarity.

Resolve issue where excluding review period does not visually show when using Score Labels (#157331)

Problem

- When using score labels and excluding a review period, there is no visual representation to the user that it is excluded. Normal gauge display shows 'EXCL'.

Solution

- Ensure that the label mapping score displays similarly to the normal gauge when the review period is excluded.
-

Report Builder

Resolved gRPC cache bust (#157266)

Problem

- gRPC cache bust missing

Solution

- Added gRPC cache bust
-

Ruleset Management

The default landbot icon does not show the bubble's background colour (#157348)

Problem

- The default landbot/Signibot icon on the integrations page just shows the raw icon.

Solution

- Show the background colour that is used when displaying landbot/Signibot on the dashboards in the preview as well.

The bottom "Save" button now saves Landbot customisation changes (#157354)

Problem

- If a user made Landbot customisation changes and used the main "Save" button on the integrations tab it did not save the changes.

Solution

- The main "Save" button now also saves the changes.

Landbot customisation bug fixes (#157293, #157295, #157298, #157300, #157306)

Problem

- "Choose File" button is styled incorrectly.
- Validation of png's, JPEGs, and WebP files was incorrect.
- When the custom icon was selected, but no file was uploaded, it showed an error.
- Headings were not capitalised.
- The success message is not prominent.

Solution

- Use the ruleset's secondary colour for the button.
- Correctly validate the images.
- Change the option back to the default icon.
- Capitalise the headings.
- Added a green border and background.

Revision #1
