

Version 9.1.267 (20 October 2026)

Event Scheduling

The required steps to be highlighted in red after attempting to save without completing them. (#156886)

Problem

- There is no clear indication of where the required steps need to be filled in.

Solution

- Add a red outline for the course selector when the form is not valid

Hr Processes

Fix: when fallback approves, there is no indication that the original intended person did not approve that level (#157286)

Problem

- When fallback approves, there is no indication that the original intended person did not approve that level

Solution

- Display the details of the user who approved the request instead of always the user it was assigned to

Main Dashboard

Fix translation error on Timeline when logged in with other languages (#157271)

Problem

- Translation error on Timeline when logged in with other languages

Solution

- Ensure translations work for all languages on the dashboard

People Management

Resolved kudos cache method (#157440)

Problem

- Cacheable query was not set to be user-specific and therefore viewed one another's kudos

Solution

- Added correction to vary by user and bustable methods

Fix Add new person modal showing extra characters (#157246)

Problem

- The reporting-line selection modal displayed / instead of/in Parent/Guardian headings due to double HTML encoding.

Solution

- Decode the translated heading before Razor encodes the attribute, preserving safe text rendering and displaying the slash correctly.

Fix an error message appears after saving a people group with an existing name. (#156743)

Problem

- An error message appears after saving a people group with an existing name.

Solution

- First, check if a people group with that name exists and return the appropriate response message if so.

Fix: When searching in People Management and typing slowly, it sometimes removes the last letter you typed as it reloads (#156629)

Problem

- When searching in People Management and typing slowly, it sometimes removes the last letter you typed as it reloads

Solution

- Ensure that your last typed letter does not get removed

Performance Management

Added change to show feedback report once final ratings approved (#157431)

Problem

- Existing change to only show feedback report once moderation has been approved

Solution

- Request to change to show once final ratings have been approved

Resolved multiple scrollbars on user contract page (#157359)

Problem

- On smaller desktop screens, the contract page showed multiple scrollbars, making it difficult to navigate.

Solution

- Adjusted the page layout to fit the available screen space, removing the extra scrollbars while keeping the content and footer accessible.

Ruleset Management

Show current icon/sprite file on settings page (#157346)

Problem

- When opening the chatbot customisation settings, the current icon/sprite's filename does not show.

Solution

- Added a custom file picker to show which file is currently being used.

Fix error on console when adding template (#157272)

Problem

- Error on console when adding template

Solution

- Corrected invalid row and column spans in the Product Setup table headers so DataTables initialises without errors.

Fix logging in with Portuguese causes the We're Sorry page on Ruleset Setup pages (#157269)

Problem

- Logging in with Portuguese causes the We're Sorry page on Ruleset Setup pages

Solution

- Fix by removing the duplicate translation key
