

Version 9.1.43 (25 October 2023)

People Management - People Groups

People Groups (#105910)

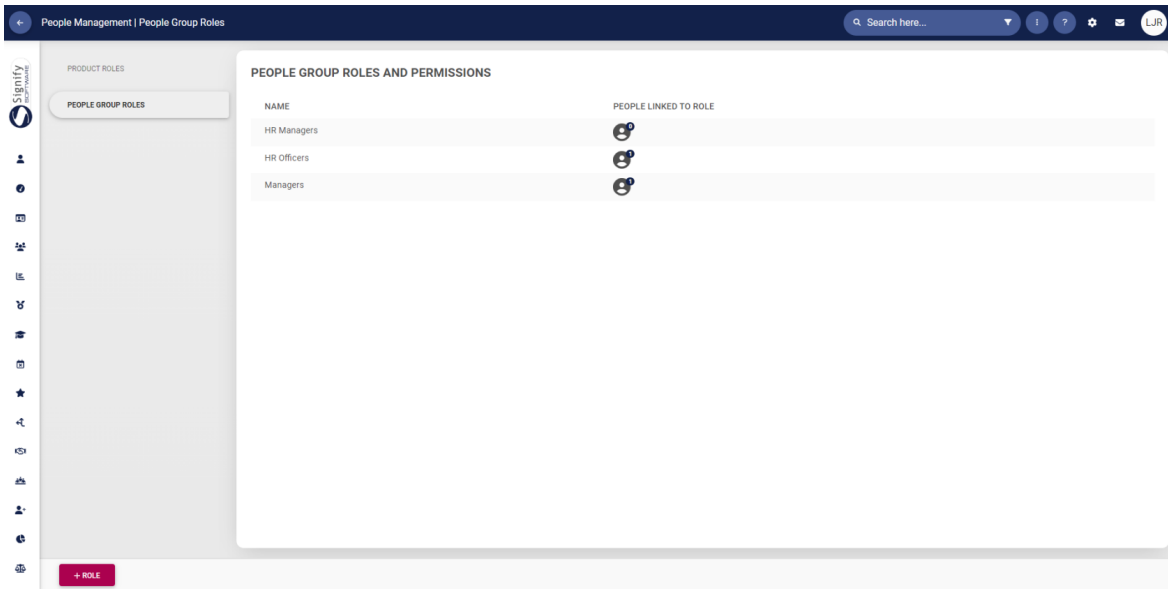

Adding functionality to create Reporting Line and Organisational Unit type People Groups in addition to Custom People Group types.

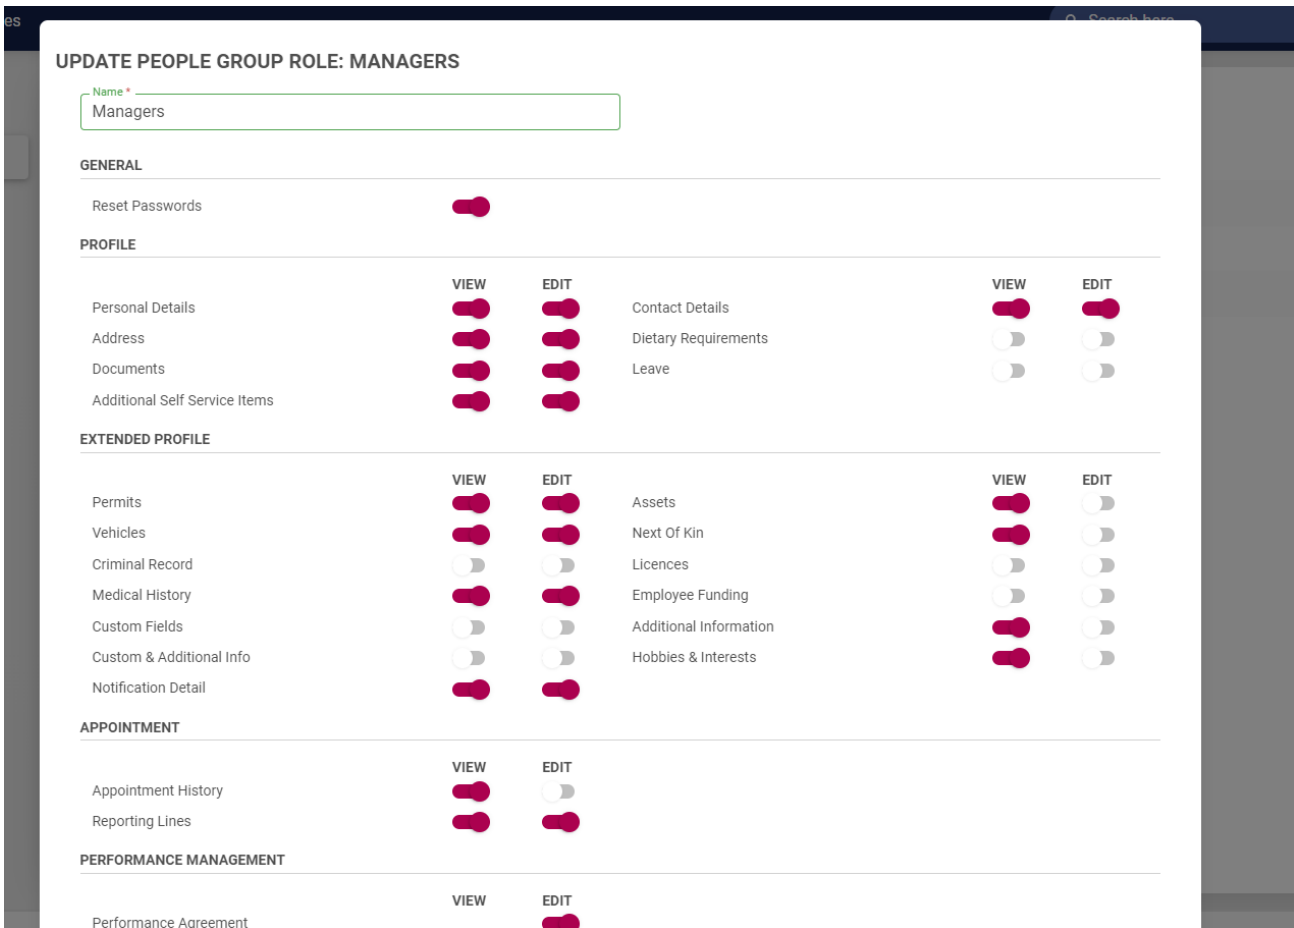

People Group Roles (#105910)

The ability to add People Group Roles with specific permissions that can be used to link to people.

List of People Group Roles

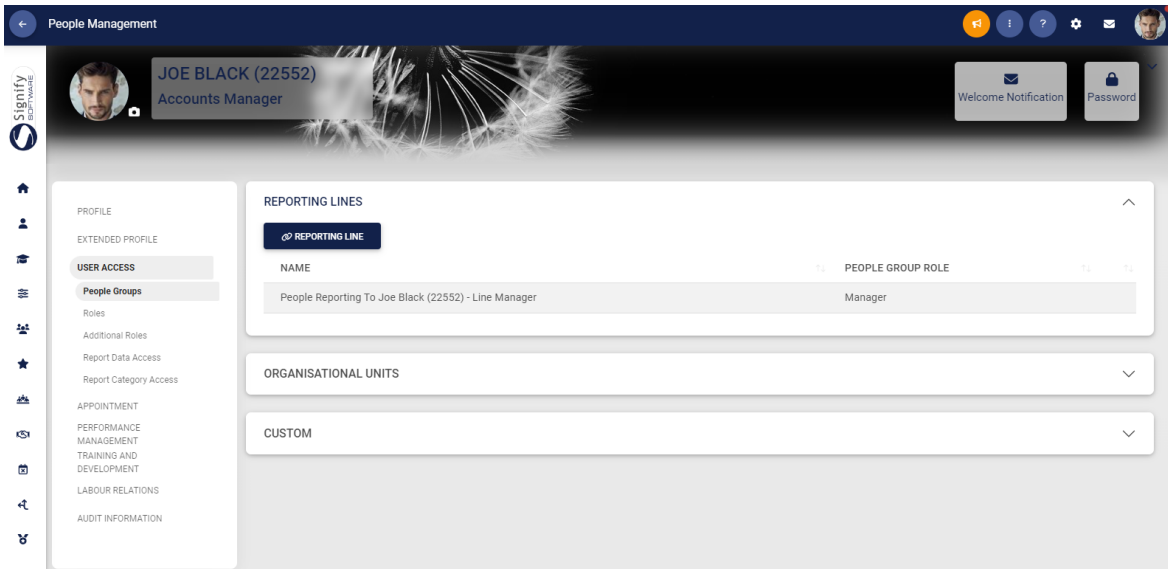

Permissions

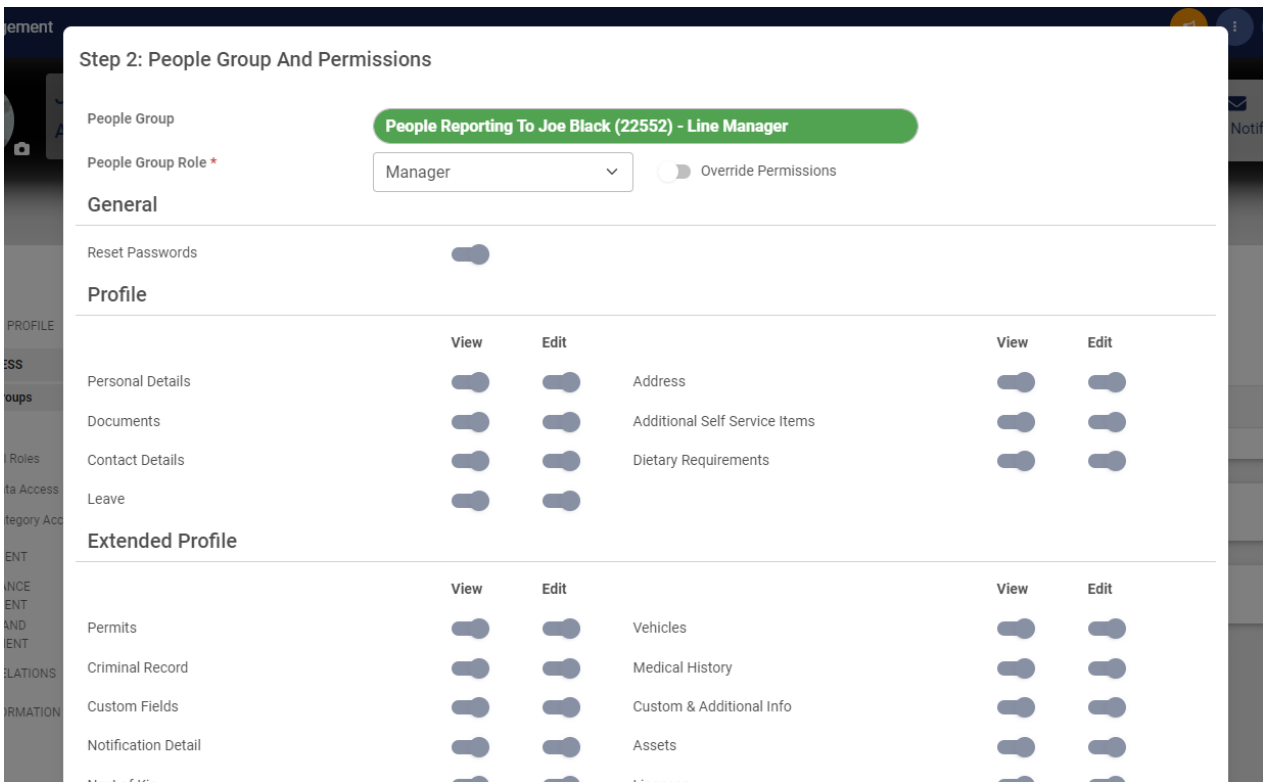

People Management - User Access | People Groups (#105910)

The People Group Roles with the permissions are linked to individual people. The following People Group Types can be linked:

- Reporting Lines
- Organisational Units
- Custom

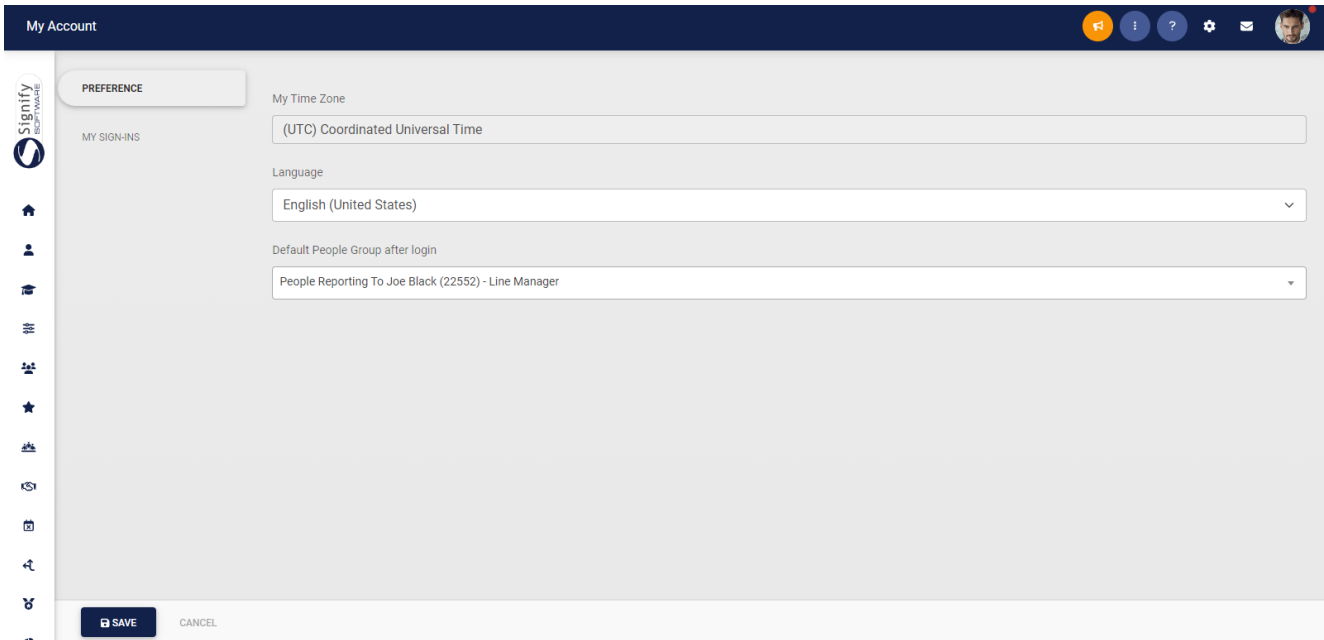

Permissions linked to the selected Role

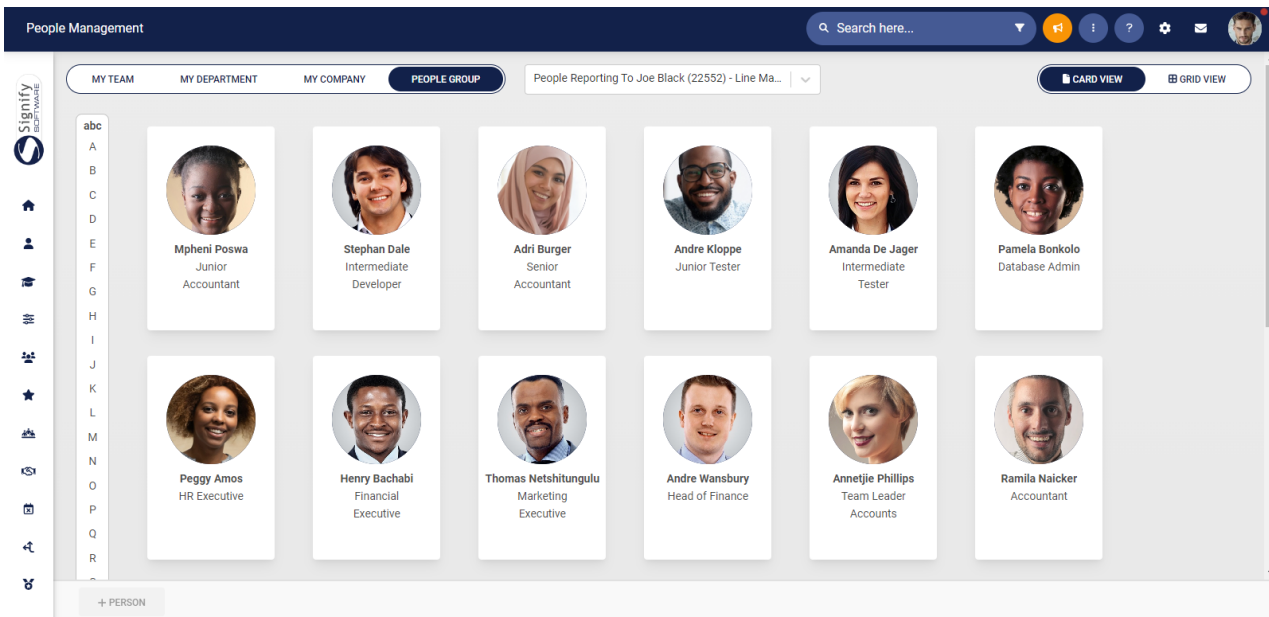

Default People Group after login (#105910)

The user, with access to People Groups, can set their default under their account.

People Management Dashboard - People Groups (#105910)

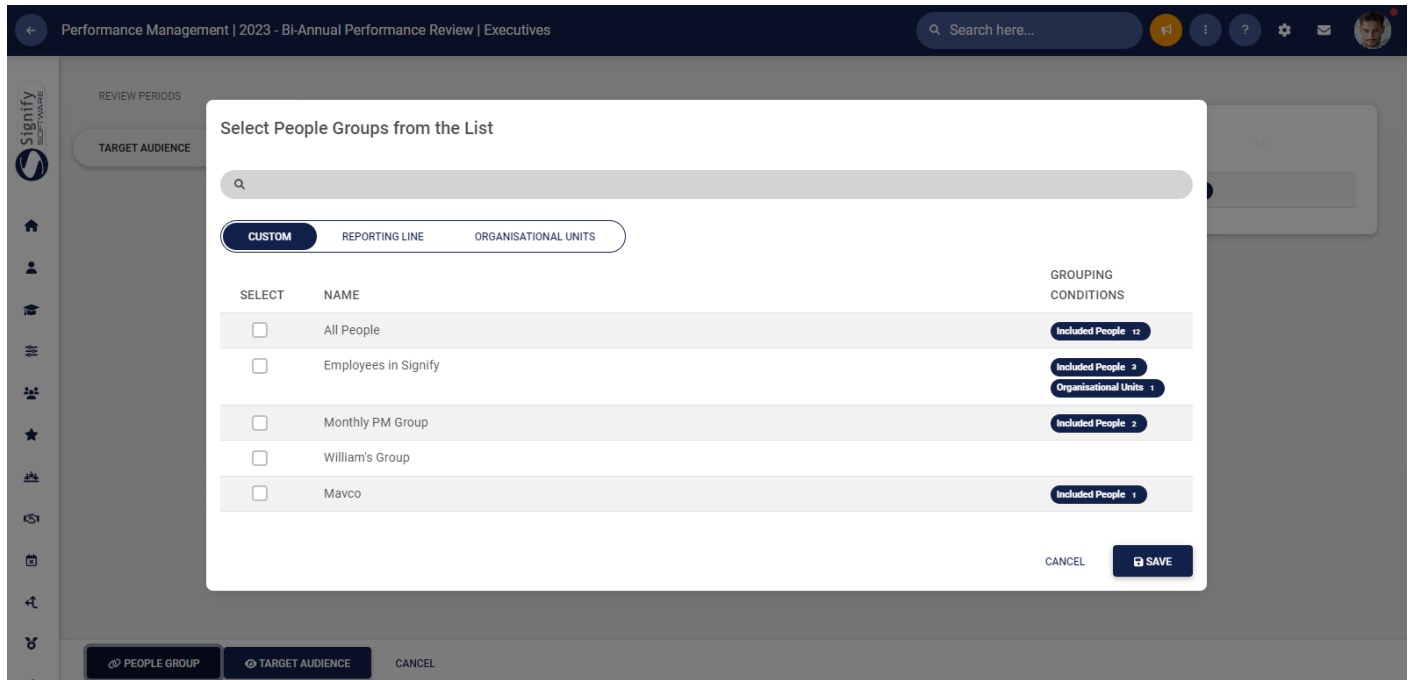

When a person has access to 1 or more People Groups, they can switch between these People Groups.

The permissions linked to this People Group determines what actions the person can perform, for example to view or edit a person's profile.

Performance Management - Target Audience on a linked Review Setup of a Review Year (#105910)

When linking People Groups to the target audience of a Review Setup, the new Reporting Line- and Organisational Unit types of People Groups can now also be linked.
