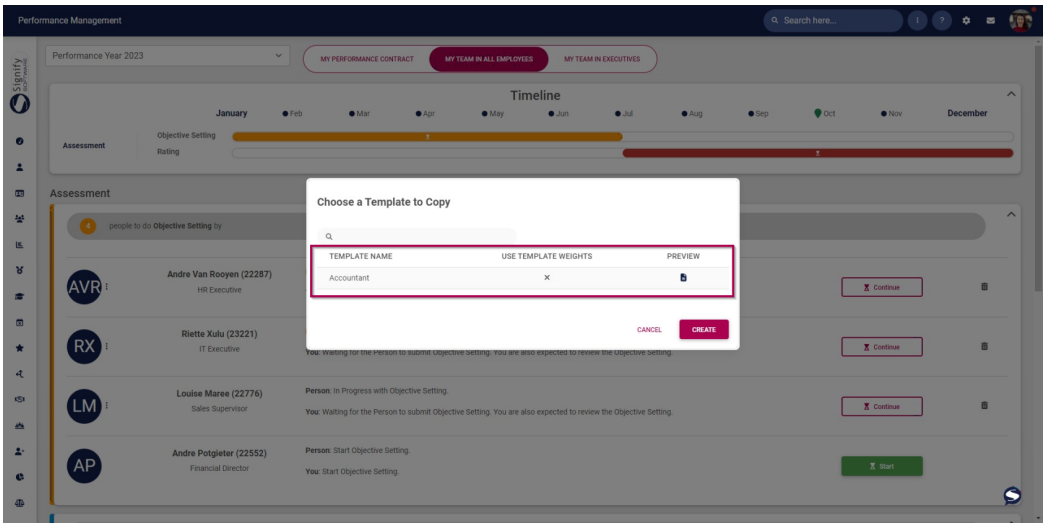
Version 9.1.46 (25 October 2023)

Performance Management

Only published templates to be available when creating an agreement (#109118)

A filter has been added to only show templates that have been published when copying from a template to create an agreement.



System Access

Allow ID Numbers with alphanumeric characters (#109010)

Removed the validation on the Forgot Password page to allow alphanumerical characters when verifying the ID Number.

Correct theme loading on Reset Password page (#108985)

When resetting the password, the correct theme is included in the Reset Password link on the notification that a person receives when opting to reset their password.

People Management

Increase ID Number field's max characters (#109130)

The maximum field length for the ID Number has been changed from 13 to 30 characters on the Personal Information screen.

People Groups (#105910)

Bug fixes has been made including:

- Implement permissions on the edit pages
- Disable the ability to add a person when the active people group is not an Organisational Unit type People Group
- Don't allow managing a person when not on the People Group tab
- When adding a new person, they display on the list
- Correct People Group Roles where the names should be unique
- Resolved the Reset Password button when breaking
- Reset the toggle on the Delete modal when deleting a People Group Role
- Excluse already selected People Groups when linking a People Group
- Send the Welcome Notification when adding a new person
- Implement the functionality to create a default role with all permissions and linking the default People Group to the first Ruleset user
- Resolve error when you add a new Role with the same name as a deleted item
- Add focus on the People Group Role name when empty upon saving
- Add a pointer on the table row when linking a People Group
- Correct the People Group Roles on User Access, Appointments and Performance Management Menus
- Add Employee Number field
