Version 9.1.60 (15 January 2024)

Performance Management

Hide SigniChat icon (#108015)

The SigniChat icon is hidden so that the Save button can be selected when adding a General Comment.

Styling changes on Print View (#107531)

Updated the styling so that the Print View items are aligned.

Improve error message for duplicate values (#107529)

The following rules have been implemented regarding duplicate items:

You cannot add:

1. a KPI to a KPA that already has a KPI with that name
2. a KPI to a KPA where that KPA is already added to the contract and has the selected KPI as 1 of its items (duplicating KPA to KPI options)

Key Competency Name shown as editable (#106698)

All inactive/disabled/not editable fields are always shown in gray.

Allow backspace to clear weight on KPA (#107045)

The backspace now clears all the numbers.

Status on Check-In banner (#107515)

The incorrect Next Action was displayed on the check-ins page. The same instruction is now displayed on check-ins as on the agreement.

Incorporate and allow to edit review surveys score setting (#107323)

No employee should be able to edit/update the review survey score.

Business Rules:
Setting name:

- Allow the Manager to edit review survey scores

Rules:

- When this setting is enabled, managers can edit these scores
- Employees should not be able to edit
- When impersonating, Admins should be able to edit the review survey score regardless of whether this setting is enabled or disabled.

Organisational Structure

Only load the first 2 levels (#108648)

Load first two levels in org tree, load children of higher levels as needed.

Adjust badge styling on treeview (#108943)

Added the treeview in a white card so that the badges are clear.

Competency Analysis

Add ratings on screen (#109839)

The ratings are now available on screen. The user do not have to select the book icon to open a page for the ratings.

Notifications

Add example data when sending a notification template (#93775)

Example data is added so that the placeholders do not display. This is an example of how the template looks when a user receive a notification.

People Management

Add username to the Profile (#105463)

The username is also displayed on the My Profile page

Deleted roles are added again (#108438)

Fixed the issue where a deleted Admin Role is added again.

Fix paging / load more on sections (#104135)

The system displayed duplicated users after loading more users on the page. This has now been corrected.
