Version 9.1.71 (27 February 2024)

People Management

When creating a user from the front-end, don't create an appointment record through the materialisation integration event (#112756)

Ensure that the person's profile can be accessed without receiving an error.

Performance Management

Cannot update KPA weights (#112817)

Fixed the issue where the KPA weights could not be updated and resulted in an error.
