

Version 9.1.78 (8 April 2024)

Report Builder

Data Source Setups to not be archived (#85116)

When retrieving data source setups, make sure the setup is not archived.

Ruleset Setup

Copy Countries and Locations (#89623)

Resolve the issue of copying countries and locations when creating a new Ruleset.

Performance Management

Terminated Managers should prevent a user to submit objectives or ratings (#113183)

People Management

When a person is terminated, the manager should still be linked but have a label with [Termination] at the end.

The input fields should be made wider to accommodate this:

People Management

Delete modal not correctly enabling the Delete button (#113743)

Problem

- A recent change had caused that the delete modals on Next of Kin, Assets and Permits not work because of how it handled the deletion reason.
- For the above there is no reason displayed and to bypass the validation that happens for the delete button to enable " " was added to the input.
- Recent changes on the global delete.ts functionality however had a check introduced that no empty reasons are provided, and in doing so it trims the input removing the " "

added and failing the validation.

Solution

- Removed the " " from being inserted on the delete modals here, and instead made use of the newly added ShowDeletionReason property which better handles not showing the input and then does not check for it having a value.

New functionality - Address Development (#112076)

Master Data

3 new Master Data lists have been added for:

- Countries
- Provinces
- Work Locations

Countries	The list of countries used in an organisation.
Provinces	The list of provinces within countries used in an organisation
Work Locations	The list of work locations used in an organisation

Organisational Structure

When adding / editing a organisational unit, a new section has been added:

Heading

- Business Address

Field

- Location
 - The data is derived from the Work Locations master data items
