Version 9.1.79 (8 April 2024)

Report Builder

Report Imports (#85116)

Fix report import which failed due to an error in the query which retrieved the data source setup.

System Access

Implementation of login redirects using a generic short URL for both V9 and V8 redirects (#112314)

A new API/ gRPC endpoint has been added to generate LoginRedirect links that can be shared with users to securely log in to a deep link in either V9 or V8.

Performance Management

Allow user without a PM admin role, to preview a template (#113910)

Problem

- When starting the Objective Setting, a person with no Adminstration Roles could not view a template before selecting it to create the Agreement.

Solution

- The role check has been removed and is no longer dependant on the Admin Role.

People Management

Implement a selector of a default active people group (#112784)

This issue has been corrected by setting the first people group linked to a user as the active people group of the user if no preferred people group has been setup yet.

Display manager with all information (#113942)

Problem

- The Manager's Location in Organisation was not displaying and the it also showed that the manager cannot log in and the position is not active.

Solution

- Include the Manager details in the same query as the rest of the people's details.
