Version 9.1.83 (22 April 2024)

Performance Management

Inactive library items shows on lists when adding (#114018)

Problem

- When the library items are inactive in Master Data, they are shown in the lists when adding a Perspective, KPA or KPI
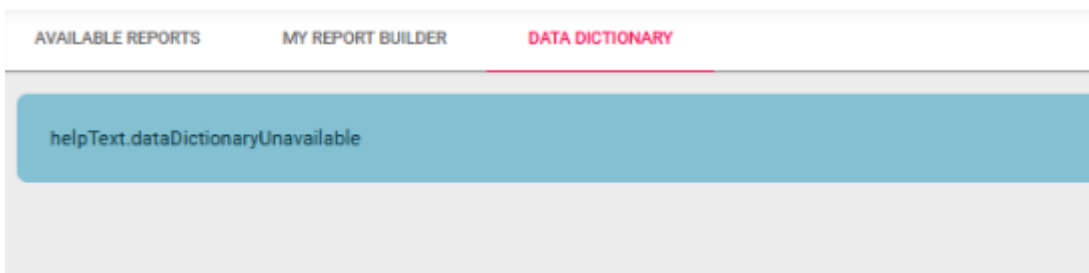

Solution

- Do not show the inactive library items - exclude them from the lists

Report Builder

### Informational message not translated when landing on the Data Dictionary tab (#111689)

Problem

- When accessing the Data Dictionary tab, the information message is not translated

Solution

- Add translation for the information message to display

Error when re-importing previously deleted Action Plan Report (#111717)

Problem

- If you delete a report and try to import that same report, an error will be thrown, because when it searched for the existing report it did not consider the Deleted flag.

Solution

- When retrieving the existing report, check for Deleted and not Deleted.
- This allows the user to import a report when it was previously deleted. If it was deleted, it makes the report active again after the import.

Ruleset Setup | System Menu

Add the Moderation menu item (#112916)

Problem

- The Moderation menu item is not available in V9

Solution

- Add the menu item to be selected from the System Menu tab
- Access the menu and content from the Main Menu
